# Traffic Control & Reports System

Vsense Technologies

➢ Operating since 1999

➢ Headquarters located in Netanya, Israel

➢ Designing and integrating advanced security solutions

➢ Providing custom made solutions

➢ An authorized integrator for security turn key projects for police and government agencies

➢ Operating through a global network of representatives in more than 20 countries in Europe, Asia & Australia

SpeedCam System Advantages

➢ Offering advanced automatic speed cameras and Red light reporting system – <u>the only approved international standard system</u>

➢ Zero false alarm rate – ground sensors which measure cars distance

➢ Vandal protection

➢ Cellular communication between camera posts and control center

➢ Helps reducing road accidents

➢ Increasing roads safety

➢ Creating source of income to municipalities and governments

➢ System calibration – operation can be set for one lane or more, choose between car, trucks, buses, etc….,

SpeedCam System Advantages

➢ System calibration

  System operation can be set for one lane or more,

   Choose between car, trucks, buses, etc,

➢ System can transfer traffic load to police traffic control center

➢ Speed limits can be set per vehicle or per lane

➢ End to End solution – from road recording of traffic violation to issuing traffic report to car owner

General Data

➢ Each state spend hundreds of millions of dollars every year as of road accidents

➢ Higher insurance costs

➢ Each year more than 1 million people are killed in car accidents

➢ Costly manual laser systems operated by police units

➢ Automatic solution contributes income for government

Roads Violation Caught On System

Enforcing Speed limit

Red Light Violation

Control Data Center

➤ All data from cameras received in control center
➤ Data can not be changed – secured data
➤ Images from camera can not be changed - approved by court
➤ Automatic system integration with client billing system
➤ Sending traffic report within 96h from report point
➤ Automatic traffic reports and Financial statements
➤ Billing reports
➤ Statistics data

B.O.T Project Proposal

➢ Vsense will install 10 cameras for first pilot

➢ We will create system integration for billing systems

➢ Vsense require government guaranty for project

➢ Revenue sharing for a period of 6 years
