

# 6.4 Volt Electronic Crimper & Decapper

### Features:

- Powerful motor with a fast cycle
- Long lasting battery with Lithium Ion technology
- Advanced charging system including warning light when recharging is necessary
- Can be operated while charging
- Convenient controls on top of unit to adjust crimp
- Optional base and mounting kit (5ABAS0)

CRS electronic crimpers and decappers fit standard laboratory vials and seals with aluminum or two-part aluminum/steel caps. The electronically adjustable cycle is accurate, reproducible, and can be adjusted with the control pad on top of the unit.

The tools are ergonomically designed to reduce strain and arm injury associated with many manual crimping tools. Available in 8 (crimper only), 11, 13, and 20 mm cap sizes.

### Rechargeable

The tools can be recharged in one to two hours with the universal power supply included. The power supply includes a plug set for operation in most countries.

Description	Item No.
8 mm Electronic Crimper	5A08C0
11 mm Electronic Crimper	5A11C0
13 mm Electronic Crimper	5A13C0

# High Power Electronic Crimping Tool

11 mm crimper and decapper jaws

20 mm crimper and decapper jaws

## Features:

- Higher-power version of electronic crimping tool with a fixed power supply and cord (No battery)
- Uses interchangeable jaw sets
- Stores separate programs for different caps and seals
- Strong enough for all steel and magnetic caps
- Optional base and mounting kit

Jaw Sets are easy to change. Simply insert the jaw set into the bushing at the bottom of the tool. Push up and twist until the set locks into position

To remove, push the outside button and rotate.

# Manual Hand Crimper & Decapper

## Innovative Design Body

The body is constructed of tough, light-weight glass-filled plastic for strength. CRS's ergonomically curved handle design conforms to your natural hand grip, which greatly improves comfort over blocky metal grips.

The bottom-pull handle design is steadier to hold than top-push handle designs. The head does not wobble. It is easy to hold the tapered jaws of the crimper in a stable position, as the bottom handle is pulled up.

## Adjustment Knob

- Easily-viewed
- Easy to see when crimp setting has been reached

## Tough Glass-filled Plastic Body

- Strong light-weight material

## Bottom-Pull Handle Design

- Stable position design compared to top-push handle designs

## Curved High-Strength Plastic Handles

- Conforms to your natural grip
- Improving comfort over blocky metal grips

## Adjusting the Crimp Setting

The adjustment knob is conveniently positioned at the head of the crimper, clearly displays + and - symbols along with directional arrows. This simplifies adjusting the intensity of crimp desired. No more "extra squeeze" necessary! Allows to clearly see the crimp setting has been reached when the knob touches the crimper body.

To ensure a smooth and consistent operation, the hand crimper uses the same precision tolerances as the CRS Electronic Crimper and Decapper.
