

Our Intentions

As a medium-sized private enterprise that has been owned by our family for more than 50 years, we feel particularly committed to our customers' interests. One of our major intentions is to live up to the reputation and tradition of the quality label "made in Germany".

In the north Bavarian town of Hersbruck we manufacture high-quality measurement tools for the most diversified applications. These products meet the highest demands of trade and industry. On top of that, BMI succeeds in combining tradition and innovation.

This is also highlighted by our way into laser levelling.

Since 1993, BMI has been one of the leading manufacturers in this technology. Our latest development is the self-levelling, remote controlled rotating laser, called BMI topoMAT.

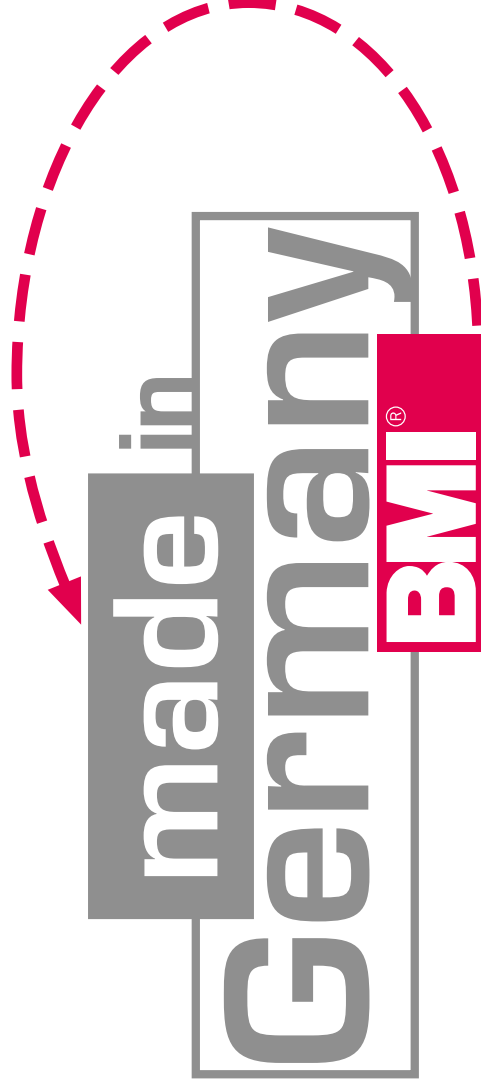

A further indication of the continuous innovation are more than 40 active patents. Some of our patented milestones in the development and production of practical measuring instruments are

- 1986** the introduction of unique spirit levels whose vials have been unalterably fixed by means of ultrasonic welding
- 1986** the minimization of a tape breakage hazard through the FLEXTOP tip for measuring tapes
- 1992** measuring tape frames with ball bearings of the ERGOLINE series for left and right handers
- 1997** hightech manufacture of EUROSTAR with unbreakable, laser-marked vials.
- 1999** the levelling laser BMI Magic and its universal usage

All our efforts follow the intention to equip you with up-to-date, marketable quality measuring instruments so that you can approach your customers in a competent and successful way.

Hans Keller
Manager and Sole Proprietor

Non Coated Steel Tape (ISOLAN) 30, 50 m.

174 40)

Blank Gauging Tape with Bob (Only 30 m.)

173N43 = white enamelled, 173N43 = high-etched)

Plastic Tape (Glass fiber with yellow)

10, 15, 30 m.

50 m.

Measuring tape made of tempered spring steel (rust-protected steel), white enamelled, in 13 mm. width, 0.2 mm. thick.

Measuring tape made of tempered spring steel (rust-protected steel), phosphated, yellow varnish, nylon coated, ISOLAN, 13 mm. width, 0.4 mm. thick.

Hard-rolled stainless chrome-nickel steel tape, rustless, break-proof, PONTARIT, 13 mm. width, 0.2 mm. thick.

Steel tape made of high etched spring steel, carbon or rustless steel, 13 mm. width, 0.2 mm. thick.

Plastic measuring tape, extruded, fiberglass, reinforced, yellow, 13 mm. width, 0.5 mm. thick
