Brand for Laundry System

QUALITY WITHOUT
COMPROMISE

Project References

Talingthai Development Co.,Ltd. has been established on 16th Jan 1999. We sell equipment related to industrial laundry: washer, dryer, ironer, steam ironer, dryclean washer, press, form finisher, hydro extractor, garment conveyor, sheet folder, marking number, boiler, etc. Customers can consult us since the beginning of the idea to build their laundry room.

To prevent machines breaking down, we have spareparts on stock ready for customers.

Machines on stock waiting for customers to select at our warehouse.

Laundry Lay-Out designed by our engineer who is professional in laundry system.

Thanks
for your
attention

After machine installation, our technician was training the operators how to use this dryer.

Our Northern branch in Chiangmai.

FEATURES STACK UNITS

- Totally freestanding: can be installed on any floor and any level
- Reduced floor space
- OPL or Coin operated versions
- Top, front and side panels standard available in anthracite grey
- Door opens 180° for easy loading and unloading
- LED indication of the status of the program
- Time remaining countdown

FEATURES WASHER EXTRACTORS

- Stainless steel outer and inner drum
- Industry-leading 440 G-Force extraction removes more moisture, minimizing drying times and utility costs
- Suspension with new out-of-balance logic
- Soap box with four compartments
- Standard with drain pump, drain valve optionally available
- Electrical heating or boiler-fed
- 6 wash programs
- Possibility of programming cycle modifier options » Added prewash » Extra wash time » Extra rinse

FEATURES DRYERS

- Galvanized steel cylinder
- Oversized lint filter located in front for easy cleaning
- Powerful exhaust blower assures short drying times and low operating costs
- Electrical or gas heating
- 4 drying programs
- LED indication of the status of the program

PRIMUS introduces the unique CASCADE™ DRUM

- Despite the 400 G extraction of water, the linen does not stick to the drum - which simplifies unloading.
- Thanks to the CASCADE™ concept, there are more perforations in the drum over the same surface - so water extraction is much more efficient.
- The design of the bulges causes even more water to be extracted - so the percentage of humidity after extraction is extremely low.
- The CASCADE™ shape of the drum holes provides extra mechanical action that produces in an even better washing result.

The **TRACE-TECH®** management software provides record of each wash load which allows you to ensure conformity with Hygienic standards. This can be stored and recalled whenever necessary. Parameters are continually controlled and stored to bring you a detailed report of the washing process. You are also informed if the machine can not complete required process.

EVO® HEAT PUMP SYSTEM - REVOLUTION IN DRYING

The main innovation provides a significant reduction in energy consumption for heating, namely by more than 60%. Plus, because 100% of the waste air is recycled, the initial investment cost is reduced - there is no need to install an exhaust system or to ensure a forced supply of fresh air when installing these dryers. Furthermore, heat is recovered from the exhaust air and reused. Additional savings come from the greatly reduced requirement for installed power - less than 4 kW compared to 10 - 25 kW for the conventional dryers of this capacity. The extraordinary results of the EVO® drying technology have been achieved by applying advanced knowledge of air conditioning and heating with heat pumps, and, in particular, the physical properties of substances used as refrigerants in refrigerators and air-conditioned cars. The easy-access machine construction is designed to minimize the time and cost of service and repair.

SAFETECH - Fire suppression system monitors for excessive drum temperatures and sprays water on the load should it register an abnormally high reading. A „system active“ signal also can be sent to a property's alarm system.

SENSODRY+ Residual moisture control (available with Full OPL microprocessor) prevents over-drying and, therefore, lowers energy costs and linen replacement costs.

I
RANGE

I25 I30 I33

I 25 - 100,120,140 cm
I 30 - 160, 200 cm
I 33 - 160, 200 cm

FEATURES I25-30

- Homogeneous ironing pressure to ensure top ironing quality
- PID controlled temperature regulation offering better temperature distribution and reduced energy consumption
- Long-life heating elements
- All vital components are easily accessible
- Start/stop pedal
- Backside of the basin is insulated with 25mm ceramic wool - no energy waste

OPTIONS I25-30

- Frequency inverter enabling variable ironing speed
- Fan exhaust removing humid air from the ironer (I25-140, I30-160, I30-200)

I25

I30

FEATURES I33

- Highly polished steel, thin cylinder
 - Rapid response to temperature
 - Excellent thermal conductivity
- Extra heavy press roller for high-quality ironing
- Patented direct drive - maintenance-free - system
- Easy to operate microprocessor MCX
- Frequency controlled motor
- Indication of ironing speed and temperature
- Electric or gas heating
- Overheating check system (OCS) with 3 temperature sensors
- Adjustable exhaust flap

OPTIONS I33

- Coin operated version
- Central payment system operated version (CPS)
- Chrome-plated cylinder for better thermal conduction and ironing quality
- Pedal of insert table stop system
- Exhaust output on the right
- Fixation set for mounting to the floor
- Sensospeed - auto adjustable ironing speed

SENSOSPEED® is an autonomous, combined, electronic regulation system which prevents overheating of the ironing cylinder edges and regulates the cylinder's speed.

Reliable Premix overpressure gas burner for low gas consumption with high efficiency. Extremely low emissions with high steady performance.

Infra flame covers the whole width = Maximum output. Patented outer exhaust system. Maintenance free.

PRODUCT DESCRIPTION

The simple design makes maintenance of these ironers easy and possible using in the majority of cases commercial or local parts: an ideal solution for remote regions/ areas such as oil rigs or laundries onboard. E200.30 has been designed to meet the requirements of a market needing to find a balance between investment and performance.

Two ironing speeds allow a minimum speed adjustment to match different fabrics or humidities, while an electronic temperature control with freely adjustable temperature gives these ironers the necessary flexibility needed to answer the needs of the most different laundry activities.

Model	E200.30
Roller dimension	2000 x Ø300mm.
Supply tension *configurable	V.400/3N/50Hz.
Heating power	15 kW
Motor(s)	1.1 kW
Absorption (Amps)	V.230/3: 40.6A V.400/3: 23.3A
Ironing speed, variable	1 – 5 m/min
Steam Extraction	Standard Ø75mm., 360m³/h
Hourly production (recommended moisture)	60kg (25%)
Ironer dimensions (wdxh) mm.	2570x540x1080
Packing crated (wdxh) mm.	2740x730x1400
Weight gross/net	306 / 253 kg.

RECOMMENDED FOR:

Hotels, restaurants, sport clubs, communities, schools, nursing and care homes, camps, shipboard laundries, oil rigs, small industrial laundries, dry cleaning shops.

STANDARD FITTED WITH:

- **Hard chromed chest** guaranteed 3 years against corrosion
- Electromechanical control
- Two ironing speeds
- Steam extraction system
- **GEMINI dual temperature control**
- Smart foot pedal stopping roller rotation and leaving hands free to adjust linen in the introduction phase
- Aluminium feeding table
- Emergency stop button and finger protection bar
- Front linen return

FEATURES

- Large surface contact with linen over an angle of 300°
- High polished steel, thin cylinder
 - Reasonable price
 - Rapid response to temperature
 - Excellent thermal conductivity
- Easy to operate microprocessor: 20 pre-set ironing programmes
- Indication of ironing speed and temperature
- Reverse mode possible (IR,IF,IFF)
- Frequency controlled motor
- Easy to remove lint filters
- Space saving installation against the wall is possible: front return (I50)
- Electric, gas or steam heating
- Overheating check system (OCS) with 3 temperature sensors
- Ergonomic design

BE THE HIGH PERFORMANCE CLEANING BUSINESS OF TOMORROW – TODAY WITH SOFTWASH® XTREME CARE

Shower-Jet

The **Shower-Jet™** recirculation pump extracts the water from the bottom of the drum and pumps it upward. This process makes drum rotation unnecessary.

OPEN UP NEW CLEANING OPPORTUNITIES

- Clean wool, silk, and other delicates with ease, including viscose, acetate, rayon, angora, cashmere
- Clean GORE-TEX® and Sympatex without damaging the membrane or waterproofing
- Clean 70% of leather and suede garments with SoftWash® Xtreme Care
- Clean curtains

The innovative and high-performance SoftWash® Xtreme Care by Primus® using Shower-Jet™ technology give you plenty of advantages:

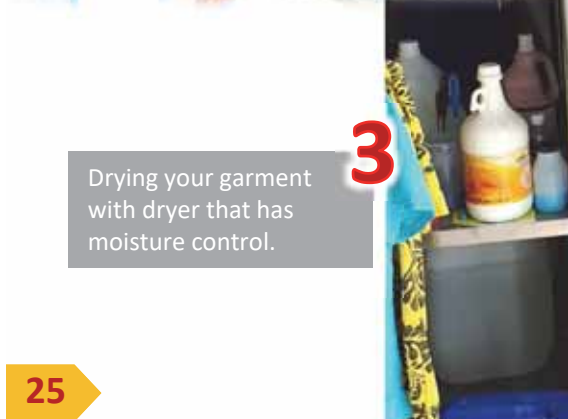

- Better cleaning quality
- Easy to use
- Lower running cost
- Increased loading factor (up to 2/3 for wool)
- Possibility to clean more delicate fibers
- Better protection of the garments
- Very little additional finishing time
- Only available on models FX135 – FX180H – FX240 & FX280 (not available on other models)

Spotting to remove the dirts from your garments. **1**

Washing your garment with so gentle cycles and with environmental-friendly chemical. **2**

Drying your garment with dryer that has moisture control. **3**

TYPE OF SHOP BY SIZE	ITEMS PER DAY	SOFTWASH® PACK (WASHER+DRYER)	ADVANTAGES
Small Shops • Dry cleaning replacement	90	Washer 13,5 kg + Dryer 13,5 kg	<ul style="list-style-type: none"> • Low investment • Ideal to do only wet cleaning
Medium Shops • Dry cleaning replacement	130	Washer 18 kg + Dryer 16 kg	<ul style="list-style-type: none"> • Perfect pack for a shop: wet cleaning and laundry washing • Can wash duvet, cover • Versatile
New shops	180	Washer 24 kg + Dryer 24 kg	<ul style="list-style-type: none"> • Perfect pack for a shop: wet cleaning and laundry washing • Can wash duvet, cover • Productivity

Reduce energy costs

No costly chemicals or disposal of hazardous waste

Lower your water use and eliminate distillation costs

Achieve up to:

34

wool items/hr

Delicate garment washed with a washer and dryer of 18kg (12kg for wet cleaning)

Cycle time = 22-25 min
Loading factor = 1/15

WASHERS CONTROL

- XControl+**
- 99 cycles
 - Fully programmable
 - Graphic display
 - Multilingual (21 languages)
 - USB port

DRYERS CONTROL

Full Control

- Up to 20 cycles, 10 preprogrammed
- Temperature freely programmable
- Drying time freely programmable
- Cool down time freely programmable

	DRY CLEANING (PERC)	TRADITIONAL WET CLEANING	SOFTWASH® XTREME CARE
Process simplicity	+++	--- Extensive training required, utilisation of new equipment	+++ Very easy to use; use of existing dry cleaner's equipment
Oil/grease stains removal pre-spotting requirement	+++ But often post-spotting required to remove pigments dissolved in oil/grease	--- Requires extensive pre-spotting, many stains cannot be removed (wax)	+++
Water-soluble stains pre-spotting requirement	--- Systematic pre-spotting of water-soluble stains	++ Requires some pre-spotting	+++
Dry-to-dry capability	+++ Clean, dry and finish < 1 hour	--- Hang-to-dry	+++ Clean, dry and finish < 1 hour
Finishing requirement	+++ Little ironing requirement; extensive post-spotting required	--- Lots of wrinkles (due to fibre swelling), extensive finishing required	+++ Very little additional finishing time compared to dry cleaning)
Cleaning possibilities (limited for those types of garments)	++ Fur, plastic-coated, rubber, solvent-soluble beads, white cotton, ...	-- Fur, satin silk, sensitive velvet, water-soluble dyes, ...	+++ Certain fur, water-soluble dyes

Specific Dosing Pump System

Dryer with SoftWash® Xtreme Care option

Wet Cleaning & laundry programs

Non-flammable detergents

Revolutionary dry-to-dry cleaning process

Process time as fast as solvent

Better productivity than solvent

Removes oil stains

No health risk for customers and operators

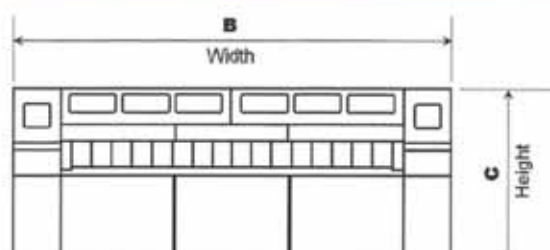

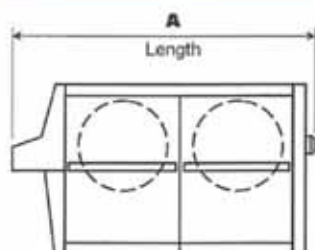

No usage restrictions compared with Perc

เครื่องพับผ้าห่ม Obifold Blanket Folder

2 lateral and 3 cross folds

Model with automatic spreader clamps.
Only one operator is needed.

- Maximum piece length: 300cm
- Maximum piece width: 300cm
- Number of lateral folds: 2
- Lateral folds: accurate and fast folding by air knives
- Number of cross folds: 3
- Cross folds: reversing belts and knife
- Power supply: 3 x 380 / 400V, 50 Hz, 3ph + 0 + earth
- Power consumption: 3.3 kWh
- Air pressure: 6 bar
- Air consumption: 25 – 35 m³/hr
- Air connection: ½"
- (any other connection on request)
- Production capacity: 900 pcs/hr
- Machine dimensions: according to lay-out drawing

Utilities information (for each machine):

- Power supply: 3 x 380/400V or 220/240V, 50/60 Hz, 3phase + 0 + earth. Machine will be supplied with 5 meter cable with 16A CEE male plug.
- Air supply: 6 bar

เครื่องพับผ้าปูที่นอน Obifold Multi Bed Sheet Folder

MAIN TECHNICAL DETAILS:

- Working width: 3300mm
- Number of primary folds: 2
- Number of lanes (primary fold only): 1, however 2, 3 or 4 lane is offered as option
- Type of folds: air pulse by double tube
- Number of lanes (cross fold): 1
- Number of cross folds: 3
- Maximum piece width (cross fold): 900mm
- Type of folds: knife and reversing belts
- Air pressure: 6 bar
- Air connection: Ø13mm
- Power supply: 3 x 380V, 50Hz (other supplies on request)
- Power: 4.7 kW

CONTROL SYSTEM

The OBIFOLD multi has a PLC based control system and colour touch-screen.

- ✓ Creating or changing a folding program is very simple due to operator friendly lay-out and simple menu setting.
- ✓ Up to 99 folding programs can be selected.
- ✓ Data can be backed-up via USB flash.
- ✓ System diagnosis for easy problem solving.
- ✓ Ethernet capability (optional).
- ✓ Communication with feeder and ironer available.
- ✓ Fault history available.

				
Electronic Steam Iron: Star with "Triple Touch" (single micro-switch in three different positions: right, central and left), safety thermostat and plug. Handle available both in "open" or in "closed version".	Electronic Steam Iron: Electronic170 Professional electronic steam iron with electronic control box and nickel Teflon sole	Steam Iron: Minivapor simple and economical, with micro-switch and safety heating element. Suitable for generators Mod. Baby	Steam Iron: Allsteam professional iron steam heated, with mechanical steam valve no electric wires , no heating element	Seambuster Electronic Steam Iron: Seam Buster professional steam iron with special design for seam opening of pants and sleeves. with micro-switch and safety thermostat
				
Iron Mod. J 2 Electrical . No steam Iron MOD.Junior E - NO STEAM with cable for power supply and plug	Steam/air Gun: Pistola connected to an external steam. used for spotting or for tapestry and saddlery work. Length of the nozzle can be set to different needs.	Steam Brush for Finishing: Liu for last touch on delicate garments, (eg. wedding gowns) or for curtains and couches.apply it to small generators, to manual power feeding	Condensate Separator Group: GFV with electric controls' panel and steam hose with support. supplied with steam iron , solenoid valve and sylicon iron rest or steam brush. or All Steam iron .	Electronic Steam Boiler 20l: BR-25 w/ electronic level control device. w/ feed pump, electronic control devices and safety door switch.Power: kW 10-12-15-18. Steam production/hr: kg 13-16-20-25
				
Steam Boiler for Iron: Arie with manual water supply, set with professional iron: Baby 1.8 • 1.8 lt boiler Baby 2.3 • 2.3 lt boiler Baby 4.0 • 4 lt boiler	Electronic Steam Boiler for Iron: BR-1 Steam boiler equipped with steam iron, 5 lts. capacity. kW 3.3	Electronic Steam Boiler for Iron: BR-2 Boiler from 5 lt. to 9 lt. Resistance from kW 3,3 to kW 8	Electronic Steam Boiler 30l : BR-50 with electronic level control device. equipped with feed pump, control devices and safety door switch.	Electronic Steam Boiler 5l, 9l :BR-8/16 BASIC: for 8 - 10 working hr/day day max. DE LUXE: for 14 - 16 working hr/day.
				
Electronic Steam Boiler55L : BR-65 with electronic level control device. feed pump, control devices and safety door switch.	Electronic Steam Boiler30L : BR-50 1PIU1 with electronic control device, pump feeding, control device and safety door switch Power: W/ tank for condensate recovery OR Tank w/ special water pump at 90° temp	Electronic Steam Boiler55L : BR-65 1PIU1 with electronic control device, pump feeding, control device and safety door switch Power: W/ tank for condensate recovery OR Tank w/ special water pump at 90° temp	Electronic Steam Boiler55L : BR-90 with electronic level control. Equipped with Feed pump , control devices and safety door switch. Available also w/ steam working pressure at 7 bar, ideal for shirt -finishers and collar/cuffs press	Electronic Steam Boiler55L : BR-90 1PIU1 with electronic control device, pump feeding, control device and safety door switch Power: W/ tank for condensate recovery OR Tank w/ special water pump at 90° temp
				
Spotting table with stainless steel board: F-793 with built-in suction fan, for external supply when it is supplied with steam iron (GFV).	Mini-spotting portable unit: MERCURY with SS board to be connected to external compressed air supply, with product gun with tank and air drying gun	Cold spotting table w/ suction cap: F-793 board and sleeves spot arm. Two spot guns with tank for liquid spot agents One drying air gun	Stainless steel Spotting table: S-782 connection to central steam , vacuum and air supplies. by pushing a pedal with a different pressure , gun releases 3 type of steam: dry, moist and wet.	Vacuum ironing table: VENUS , manual height adjustment from 930 mm. to 750 mm. powerful vacuum with built-in vacuum unit operated by pedal.

				
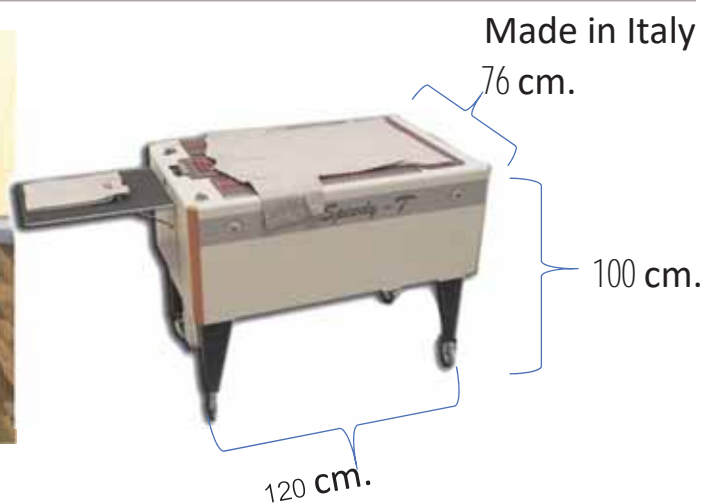

EKO2 Pre-spotting cabinet, equipped with: pressurised soap tank and spray gun, can be supplied with -additional soap tank.	Ecological cabin post-spotting cabinet: EKO3 Cabin made of SS, for POST SPOTTING , to be equipped with spotting guns according to the different needs .	Ecological cabin pre&post-spotting cabinet: EKO1 to improve the quality of your dry-cleaning, one 5 liter pressurised soap tank, SS, with soap spray gun. Post-spotting unit includes: two independent pivoting SS spotting bucks. cold spotting gun with tank and support. Air drying gun.	Universal form finisher for outerwear garments: M-780 - with boiler for the blowing finish of all outerwear garments. with a 9 liters or a 20 liters boiler capacity	Universal form finisher for outerwear: M-781 - to be connected with external steam supply, the blowing finish of all outerwear garments, suitable for laundry, dry-cleaning, manufacturing and hotel business.
				
Universal PNEUMATIC form finisher: M-781 /P for outerwear garment - to be connected with external steam supply	ECONOMO Universal former for outerwear garments : M-781 ECONOMO - to be connected with external steam supply	Universal form finisher for outerwear garments: M-781/GV - to be connected with external steam supply - sleeve stretching devices	Sleeve form finisher: SF - to be connected with external steam supply	Universal form finisher with tensioning for outerwear garment M-501 - to be connected to steam supply
				
Tensioning form finisher M-502, for connection to an external steam supply. to fulfil demands of a Wet Cleaning pressing system that requires vertical tensioning for perfect seam finishing and fabric "revitalising".	Dummy for Form finisher Mod. MAXI - for universal use for coats finishing specific for large size garments/coats with special long front clamp and large size bag Dummy's height cm. 150 Suitable for MGC - MG - MGP	Dummy for Form -Finishers WET - perfect for water washed garments for universal ironing . Without bag for a better finishing of the linings and with manual garment stretching. special clamps and sleeve expanders .	Dummy for Form-finisher STANDARD - universal for coats with adjustable bag + skirt , front and rear paddle clamps , two special clamps and two sleeve expanders . Height cm. 130 Suitable for MGC - MG - MGP	Universal Topper 823/TT- manual waist and leg tensioning
				
pneumatic Topper MPT-823/A pneumatic waist tensioner - legs tensioning with manual clamps	pneumatic Topper MPT-823/D - pneumatic waist tensioner and pneumatic trolley for leg tensioning.	pneumatic Topper MPT-823/DF pneumatic waist and legs tensioners - Photocell for locking of legs tensioning trolley	pneumatic topper MPT-823/DP2-pneumatic waist and legs tensioning - with special paddles to fix pleats	pneumatic Topper MPT-823/DL - pneumatic waist tensioner with LATERAL WAIST stretching device and pneumatic trolley for leg tensioning.

				
Magic includes men's shirts, women's blouses, polo shirts, medical uniforms, and chef's uniforms.	Universal Shirt finisher M-951 -manual tensionings	Shirt and universal form finisher EASYFORM 2000- with or without boiler	Shirt and universal form finisher EASYFORM 3000 - with or without boiler	Shirt finisher - Single buck shirt press - Pegasus
				
VEGA , the new rotary double-buck shirt press.	SIRIO291 finishing cabinet for any kind of garment :jackets , coats, dresses , trousers , skirts , etc.	SIRIO -291 socks Steam Finishing Cabinet for setting socks of any type and size or fiber. 600 pc/hr	Air operated press . CT-750/U, utility shape boards	Air operated press AT-770/U , utility shape board. Fast head movement, 60° head opening.
				
Pneumatic air operated press AT-770/UP-UP, utility legger shape . Fast head movement and 60° head opening .	Pneumatic press AT-770/L , legger shape board. Fast head movement, 60° head opening.	Air operated press CT-750/T , topper shape boards	Air operated press AT-770/U SPECIAL, utility shape board. Fast head movement, 60° head opening	SPECIAL Air operated press AT-770/UP SPECIAL, utility legger shape board. Fast head move 60° head opening,
				
Air operated press AT-770/L SPECIAL, legger shape board. Fast head movement, 60° head opening	Manual operated press ST-702/U, utility shape boards	Manual operated press ST-702/UP, utility legger shape boards	Manual operated press ST-702/L, legger shape boards	Manual operated press ST-702/T , topper shape boards

				
Manual operated press ST-702/ULL, utility shape board with polished head.	Manual operated ST-702/UPL, utility legger-laundry shape board with nickel plated heated polished head (HOT).	Manual operated press ST-702/LL, legger/laundry shape boards with nickel plated heated polished head (HOT HEAD)	Manual operated press ST-702/ULL, utility shape board with polished head.	Manual operated press ST-702/UPL, utility legger-laundry shape board with nickel plated heated polished head (HOT HEAD).
				
Manual operated press ST-702/LL, legger/laundry shape boards with nickel plated heated polished head (HOT HEAD)	Air operated press CT-750/ULL, utility laundry shape with polished head.	Air operated press AT-770/ULL, utility laundry shape with polished nickel plated head. Fast head movement, 60° head opening	Air operated press AT-770/UPL, utility legger laundry shape with polished nickel plated head. Fast head move 60° head opening	Air operated press AT-770/LL, legger laundry shape with polished nickel plated head. Fast head movement, 60° head opening.
				
Air operated press AT-770/ULL SPECIAL, utility laundry shape board with polished nickel plated head. Fast head movement, 60° head	Air operated press AT-770/UPL SPECIAL, utility legger laundry shape board with polished nickel plated head. Fast head move, 60° head open	Air operated press AT-770/LL SPECIAL, legger laundry shape board with polished nickel plated head. Fast head movement, 60° head opening,	Air operated press CT - CP, for the finish of collar and cuffs of shirts	Pneumatic Press LV-800/BB, Bosom Body shape with high grade nickel plated head
				
Pneumatic Press LV-800/U utility shape with high grade nickel plated head.	Pneumatic Press LV-800/UP, utility and legger shape with high grade nickel plated head	Pneumatic Press LV-800/L, legger shape with high grade nickel plated head.	Pneumatic Press LV-800/R, rectangular shape with high grade nickel plated head.	Pneumatic Press LAV-800/R2, rectangular / lab-coats shape with high grade nickel plated head.

				
Pneumatic Press LAV-800/R2, rectangular / lab-coats shape with high grade nickel plated head.	Pneumatic Press Mod. LV-800/F, mushroom shape with high grade nickel plated head	Pneumatic Press LV-800/BB, Bosom Body shape with high grade nickel plated head.	Pneumatic press for finishing leather garments PP-703 .	Air operated trouser press POLARIS for double legger horizontal pressing.

T-Shirt Folding and Semi-Auto Packing Machine

Optional Foot Switch

Microprocessor Control

Lockable Wheels

Easy and fast to
fold shirts & small
linen: 10 folding
programs

Max Production
500pieces/hr. and
250pcs./hr with packaging

Speedy T 2005: numbered sequence

Y151T

Temporary identification system

Print, cut and seal

PREVENT SORTING ERRORS

Color coded tapes make sorting a simple task. Shirts can be sorted into movable transporters or numbered rail clips right off the folder or finishing unit, reducing the amount of labor required. Labels print clearly, adhere firmly, and yet peel off easily leaving no residue. Label length adjusts automatically to match the number of characters used.

Thermo-Seal® taperolls

The tape specifically made for all Thermo-Seal® temporary marking machines. The eleven colors are orange, yellow, red, gray, lavender, white, green, blue, pink, gold and tan. Adheres to cotton, poly/cotton blends, loose weave polyester and wools.

Thermo-Flags® tags

Where Thermo-Seal® tape can't be applied directly to the garment, apply tape to a Thermo-Flag® and staple or pin to garment. White only.

Ink ribbon cartridge

Black indelible ink, part # RC2410-15. Prints stays clear and legible through laundering, dry cleaning and finishing operations. The ink cartridge is very easy to load.

A user friendly display

LEFT SIDE MOTOR

MODEL MDB-3

WITH AC MOTOR

Optional Features:

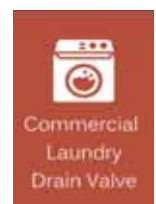

- Motor cycles (50 Hz, 60 Hz)
- Optional overflow bypass port
- Normally open or normally closed
- Wire leads or terminals on the motor
- Three different motor cover/protectors
- Replaceable inlet seal
- Updated valve housing color
- Motor voltage (24 VAC, 115 VAC, 230 VAC)
- Motor orientation (left or right side of valve housing)

RIGHT SIDE MOTOR

RoHS COMPLIANT

MODEL-W

HARDWARE FEATURES

- Advanced PCB hardware
- Brushless motors
- 16 x 4 character illuminated screen
- Wireless USB communications
- Configure any combination 2-10 pumps
- Easy add-on pump configuration
- Full speed control on all pumps
- Full range of accessories to suit your installation
- Formula select module available for easy access to programme selection
- Independently CE and UL approved

Very easy to feed the liquid chemical detergent to any washing circles. Just press the program button!

ON-PREMISE LAUNDRY DOSING SYSTEM

The BrightLogic on-premise laundry dosing systems (OPL) allow you to dose from 1 to 10 chemicals with a flow rate of up to 285ml* per minute. The space-saving patented double pump head is easy to install and maintain thanks to the quick-tube-change configuration. Suitable for both intelligent and non-intelligent washing machines up to 35kg, they can be used in relay mode or with a formula select programmer.

The laundry dosing systems are available in 2, 4, 6, 8 and 10 pump versions, however you can easily upgrade to a unit with a plug-and-play pump module.
